DENTAL
CARE

We Welcome New Smiles!

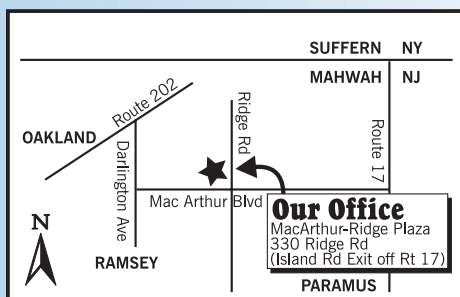

We are always happy to welcome new patients to our practice. Our dental team welcomes your call to schedule a New Patient **Comprehensive** Exam or a Complimentary Consultation with our doctors.

If you've been putting off years of dental work a couple of tablets of medication could be the only thing standing between you and getting the dental care you deserve! Oral Sedation may be available to you, as prescribed by our state certified doctors. We provide a **complimentary consultation** with absolutely no dental treatment at your first visit; just to review your concerns, questions, and medical history. Then we schedule an appointment to do the exam, x-rays and the treatment plan. The day of your treatment, you will take the anxiety relief pills in our office and watch your favorite movie until you are totally relaxed and carefree to start your dental treatment. You don't have to be afraid anymore! Read about the complete experience and our patient testimonials at www.mahwahsmile.com/anxietyrelief

Our mission is to help you achieve excellent oral health and a confident smile!

- Laughing gas & oral sedation (pills) to relieve dental anxiety
- 0% interest and 100% financing available

Dental Implants

Dental implants are more than replacing teeth...

They can help you look great!

Teeth that are lost to gum disease, cavities, or trauma from an accident can be permanently replaced by dental implants – artificial teeth permanently anchored in the jawbone. This is important. Bone loss will always follow the loss of a tooth. And if bone is lost even from only one tooth, the surrounding teeth will shift. This can affect your appearance, speech, ability to enjoy food, and your self-esteem.

- Placing dental implants soon after tooth loss can save bone, teeth, and the look of your smile.
- Implants really do look and feel just like natural teeth.
- Implants help to keep gums looking healthy and young.
- Implants have been available for more than thirty years.
- Implants can be used to anchor dentures to prevent soreness and clicking, or as replacements for dentures and bridgework

Let us help you decide whether dental implants are for you. Like any other cosmetic restoration, we'll take into account your health, where the implant is needed, the best implant design, and its suitability for your lifestyle.

Radical Results

This patient received veneers to cover surface flaws and crowns to support and save compromised teeth ...all with beautiful results!

BY COSMETIC DENTISTRY

Cosmetic veneers can utterly restyle your smile by helping you to...

Look younger by creating the appearance of fuller lips with fewer feathery lip lines and by improving the balance, proportions, and the color of your teeth.

Look healthier by permanently covering dark fillings, chips, cracks, and misshapen or severely stained teeth.

Look more attractive by closing gaps between your teeth and concealing teeth that are crowded or slightly overlapped – without orthodontic treatment.

Once you have veneers, you'll wonder what took you so long! Cosmetic veneers fuse hand-crafted artisanship with leading-edge technology to ensure they are fully customized to your unique smile. They are strong and long-lasting, yet so remarkably fine and translucent that they are as natural looking as your own tooth.

Looks Natural. Feels Natural.

Replace missing teeth and ill fitting dentures with dental implants.

Invisible Fillings

According to research, the demand for natural-looking white filling has surpassed silver filling by ratio of more than 3:1. We are proud to be a “silver-free” office!

- White fillings are not only invisible but also mercury free.
- White fillings don't discolor surrounding teeth and gum.
- White fillings don't corrode and less tooth is taken away in placing them.

Technology Saves Lives!

Oral cancer is one of the most curable diseases when it's caught early. An annual Vizilite™ Plus exam (disposable light-illuminating abnormal cells) is preformed immediately following a regular check up. It is quick and painless. Our gum specialist can furthermore perform a brush biopsy, as needed, here in our office. A few minutes once a year, is worth it for a healthier life!

We Offer Clear Braces! (Invisalign®)

It is a revolutionary technology in cosmetic dentistry. The clear aligners are removable for eating, brushing and flossing.

Supercharge Your Smile!

Get 5-star flare

No matter which terrific cosmetic procedure you choose, strong teeth and bones and pink gums that radiate health and vitality provide the keystone to fashioning your most winning and enduring smile.

Here are five easy steps to power up – and keep – the sizzle in your smile!

1. Brush at least twice a day and floss daily for a luminous smile.
2. Clean your tongue regularly to help breath stay sweet.
3. Avoid sugary and acidic foods to keep decay and tooth erosion away.
4. Rinse with water after red wine, dark berry juices, coffee, and tea to steer clear of staining.
5. Keep your regular hygiene appointments to remove tartar and bacteria and ask us to show you how to brush and floss correctly.

What could be better than your sensational smile? Why ... keeping it that way, of course!

Advance Dental Care Team

Dear Dr. Maz,

I have not been to the dentist in almost 6 years because of my fear and a bad experience with my previous dentist. A friend recommended Advance Dental Care.

I had broken a tooth and now had no choice but to make an appointment. Almost six months later I am on my way to a much healthier mouth.

From the minute I walked through the door the care was exceptional! I had a tooth extracted under sedation. I woke up, went home and didn't remember anything and I had absolutely no pain! The doctors and staff are outstanding and I highly recommend Advance Dental Care!

Sue S. 2/13/08

Advance Dental Care has been very accommodating and has been a great group of individuals for my dental care. They are definitely the friendliest staff out of any place I have ever been! A friend recommended me and I couldn't be happier! Thanks!

Rachel O. 12/10/07

Comprehensive Care at Advance Dental Care

We are proud to offer **all** of our patients the highest quality of comprehensive dentistry. We believe that prompt, exceptional customer service, diligent reminders and genuine respect are invaluable. Your comprehensive appointment is scheduled to include a full hour with the doctor to personally ensure we have focused on all aspects of your health and treatment.

**Exceptional Comprehensive Care
is Priceless!**

High Quality Dentistry Made Affordable!

Part of our job as your dental care provider is to try and work with you to ensure that your personal financial circumstances do not interfere with your dental health care decisions. This is why we recommend CareCredit®, an affordable payment program that has a unique no-interest payment plan.

CareCredit offers:

- no up-front costs;
- no annual fees;
- and no prepayment penalty!

Ask for a CareCredit application ... and begin treatment today!
